Masking fluid on the yellow petals, if you want some of the stems

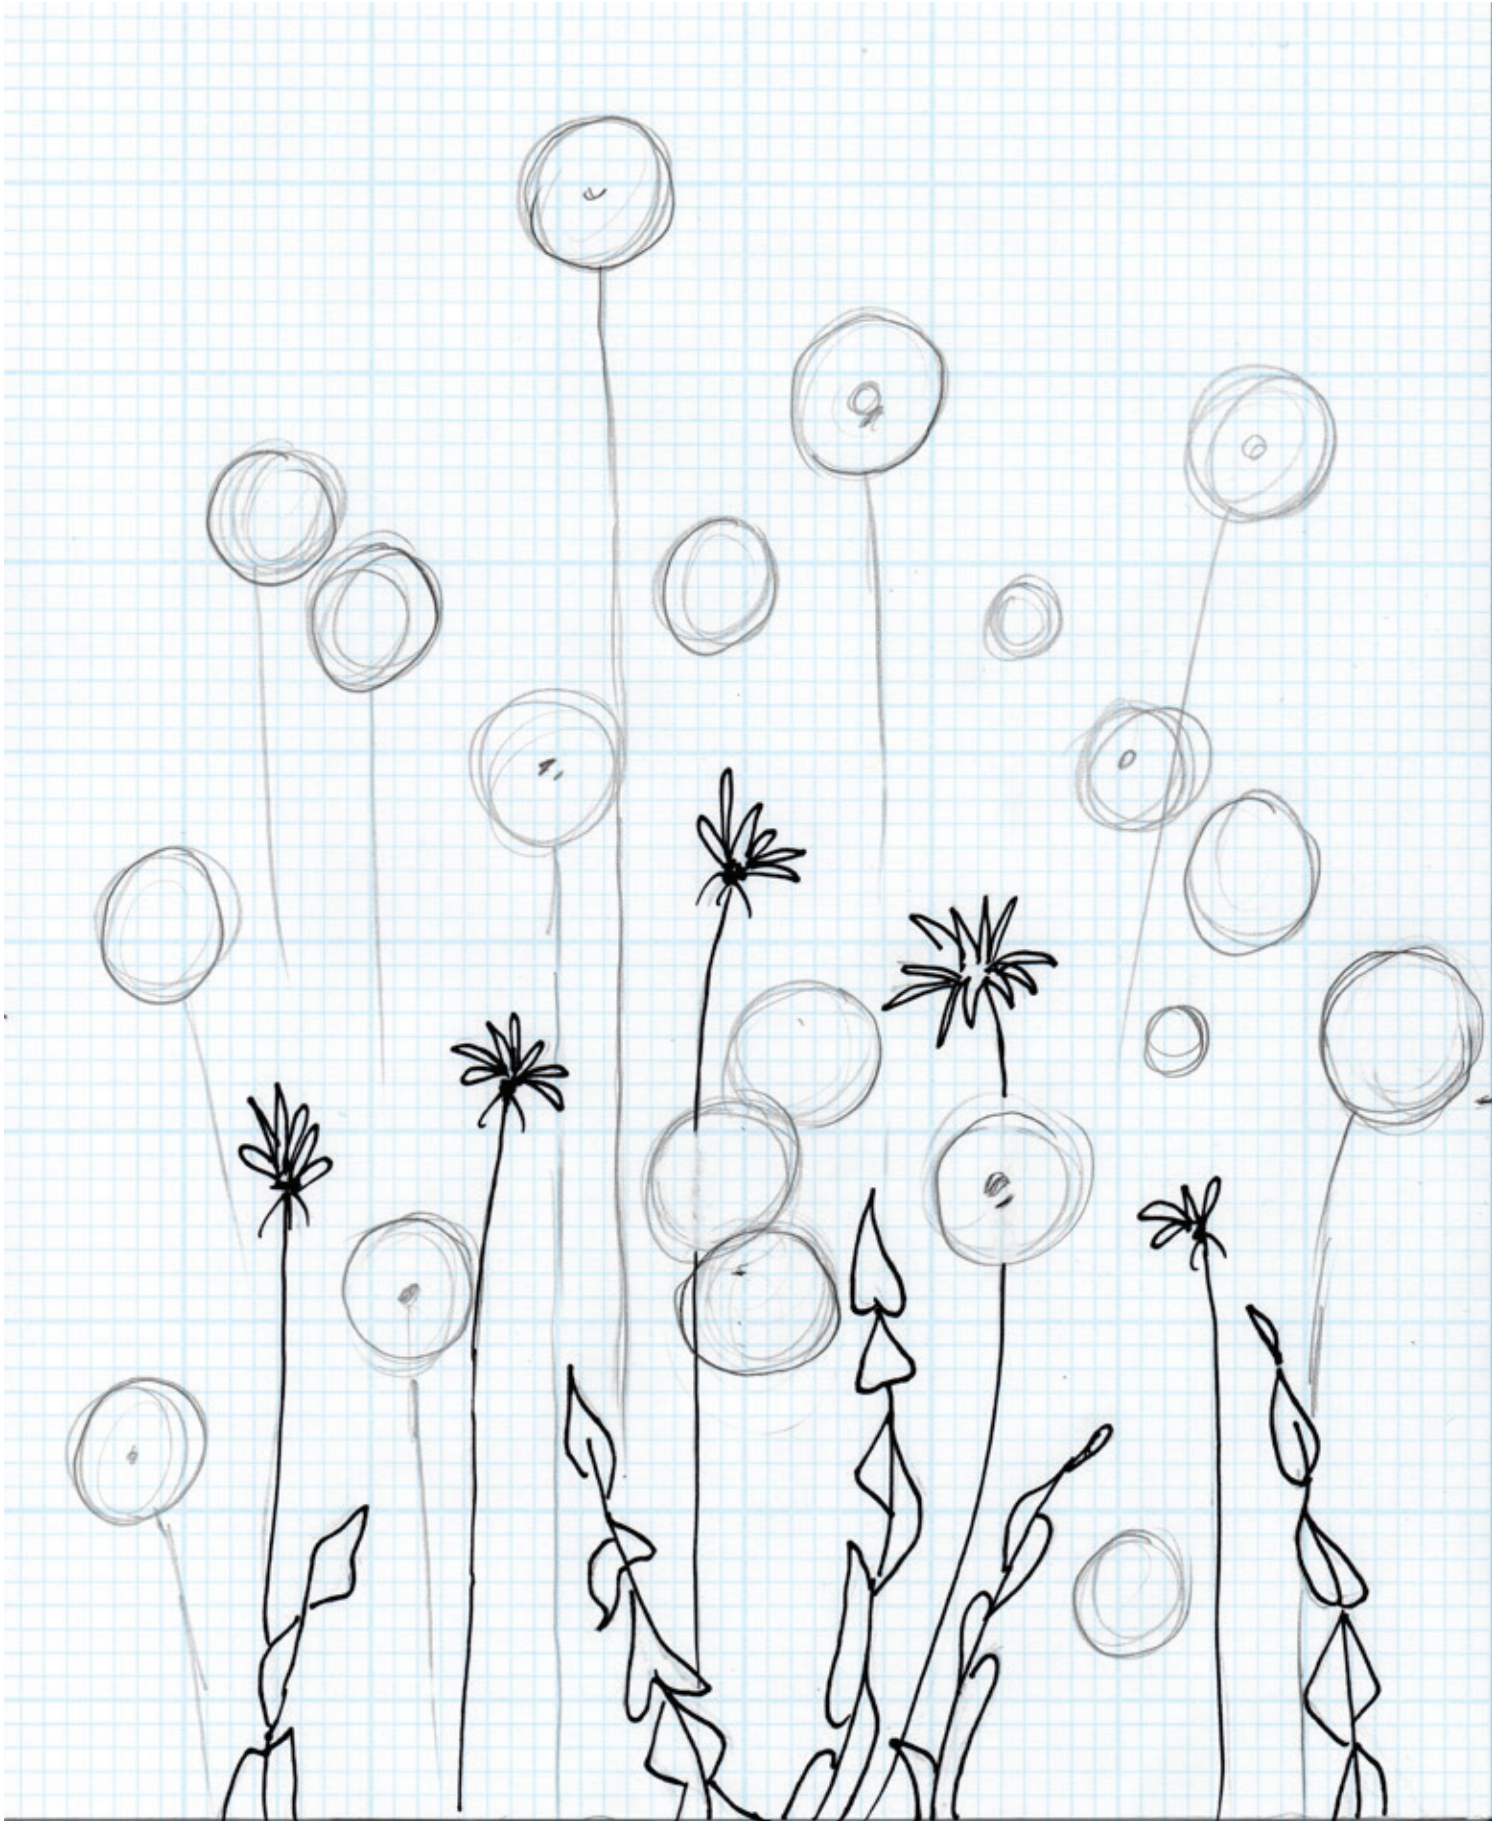

use cheap brush, sometimes the fluid will not come out if you do not wash right away

Have these ready, when we wet the background and lay down a lot of color, While it is still wet, use the cotton swab to drop alcohol drops on paper. OK if you touch paper with swab.

Darken areas around dandelion puffs to make them stand out more. Then paint yellows, add stems/leaves, Might want to scrub some of the paint off a few of the Dandelions puffs

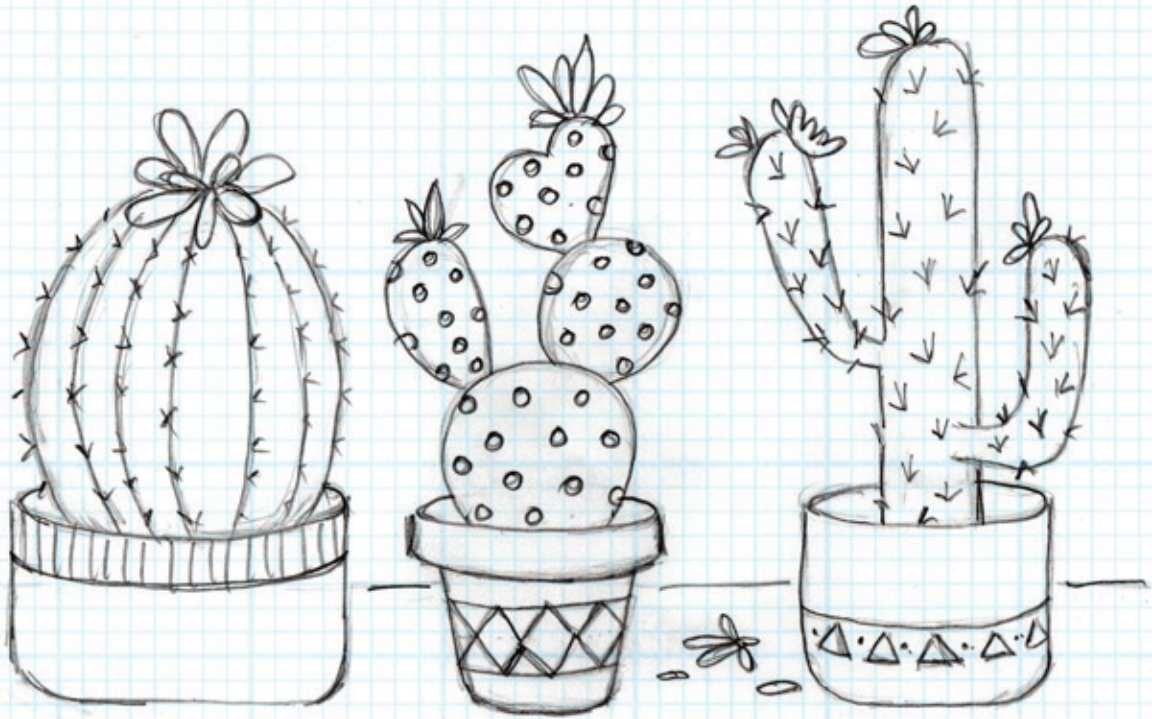

Dandelion Traceable

Splattered with orange paint: Load paint brush up with a lot of wet color. Hold parallel & close to paper, tap the handle to shake off the paint. I used a white acrylic paint marker to add white dots and some lighter areas on a few stems and puffs.

3 Cactus Traceable

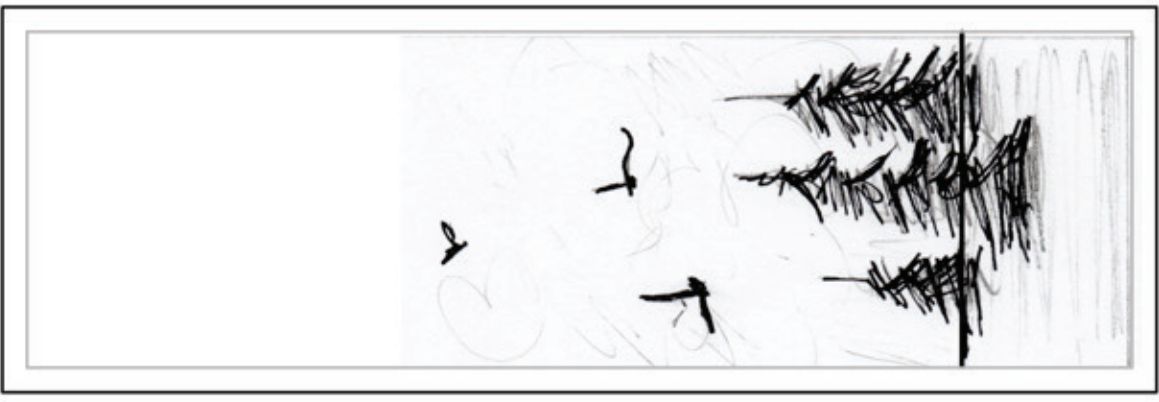

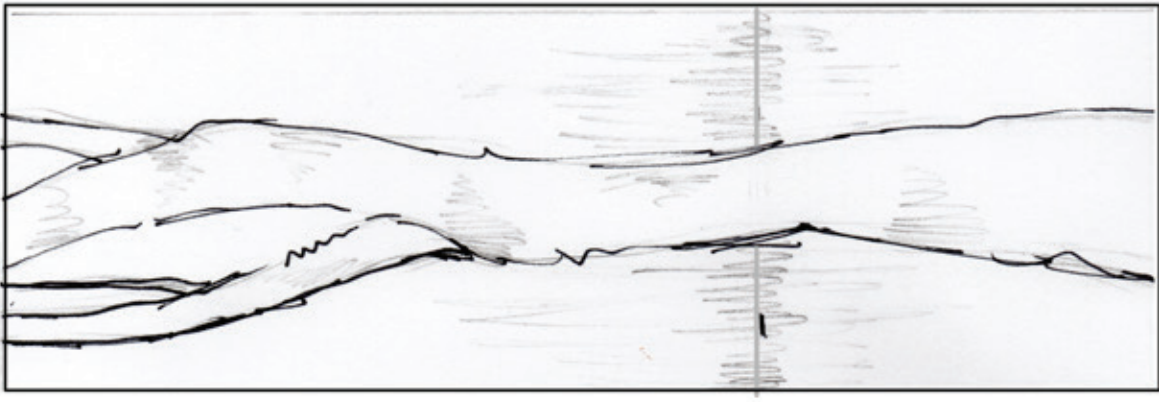

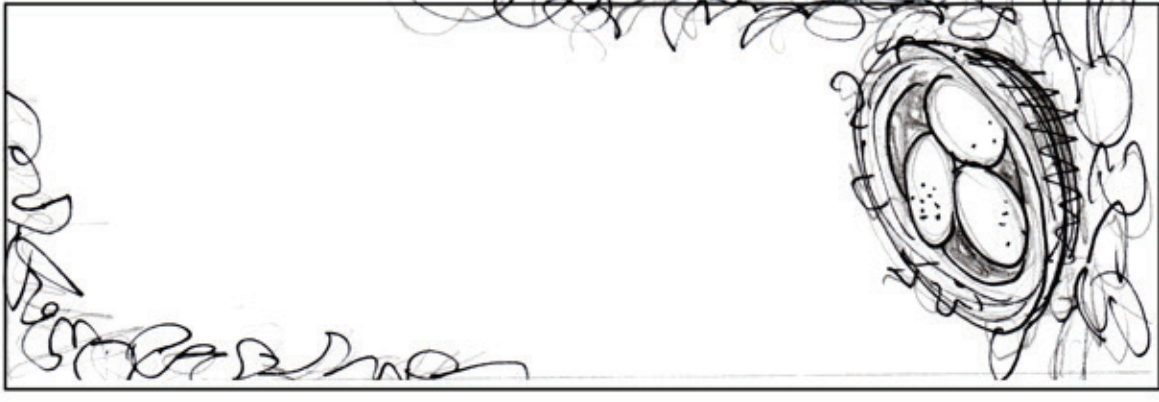

5 x 7

5x7 1.5 hrs.

Outline inside of large heart with masking fluid, letters, arrow and small hearts

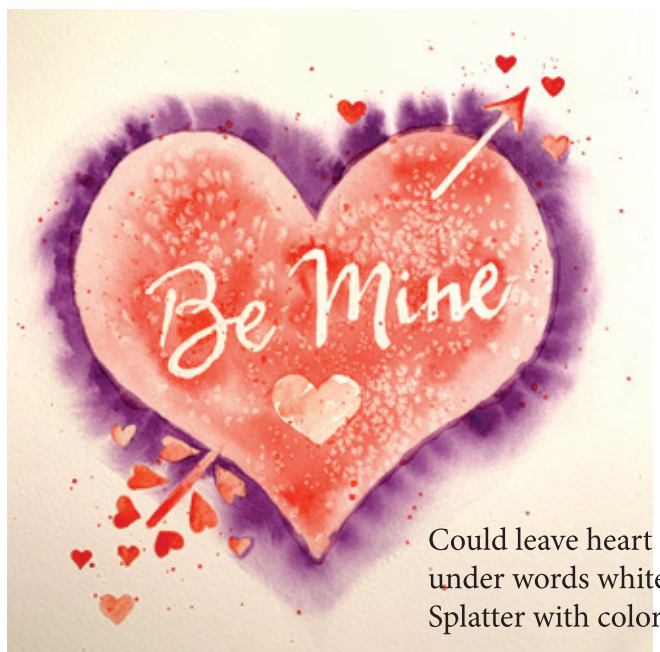

When Purple is dry, remove masking fluid from largest heart. Paint back on masking fluid for arrow

Heavy red or multi color, will dry lighter. Salt.

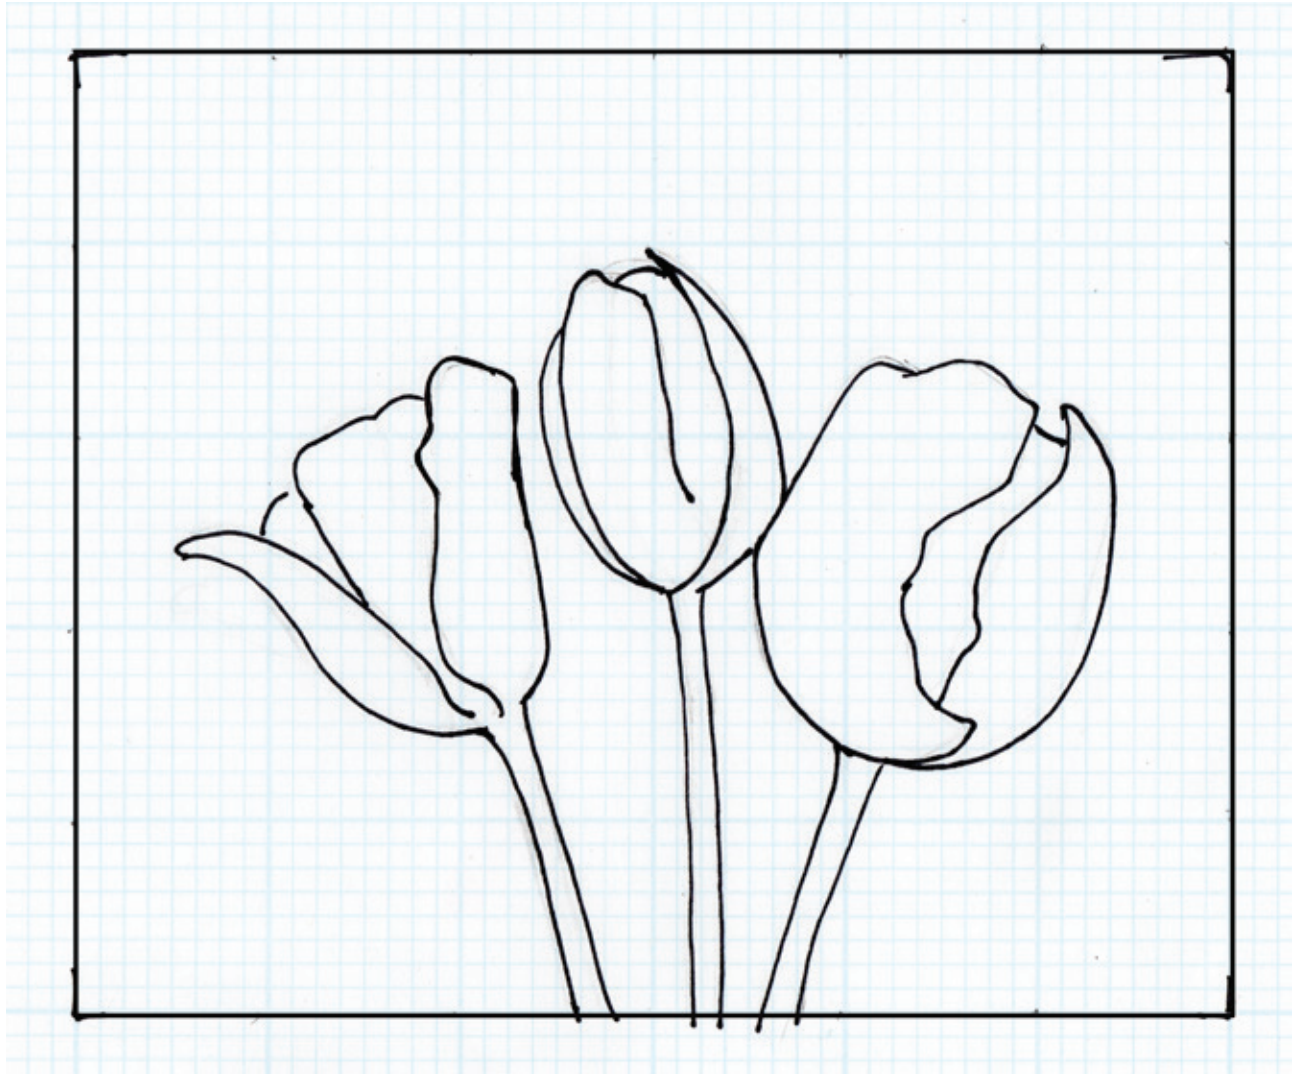

When dry, remove salt and masking fluid

Could leave heart under words white, Splatter with color.

5"x 6"

masking fluid the outline and stems of tulips. put some masking fluid dots in the background area

wet background and brush/drop color as you like

dry with hair dryer or let dry some

remove masking fluid by rubbing off with your finger or a clean eraser
